Profile

Data Science and Analytics professional specializing in transforming complex, real-world data into actionable business intelligence. Strong hands-on experience working with large-scale LMS datasets, with a proven ability to transform real-world data into meaningful insights and clear analytical outputs.

Experience

IT Solution Intern — Data Science & Analytics

Sep 2025 - Jan 2026

ICT Academy of Kerala

Engineered and analyzed high-volume, confidential datasets for the ICT Paatshala LMS (32M+ records) using Python, and built a Flask-based interactive analytics dashboard to track learner engagement and program performance. Enabled data-driven, institutional-level decision-making through structured, scalable, and production-style analytical workflows.

Projects

AI Stock Forecaster - Stock Price Prediction Using LSTM

Stock Price Prediction Using LSTM (GitHub)

Streamlit Web App

This project leverages LSTM Deep Learning models to forecast 7-day stock price movements for 25 major companies and classify the expected direction (up/down). The system integrates automated data retrieval, model development, and real-time interactive visualization through a Streamlit web application.

Education

Certified Specialist in Data Science and Analytics

ICT Academy of Kerala

2025

Master of Arts (MA) in Economics

Govt. College, Nedumangad, University of Kerala

2022-2025

Percentage: 60.5%

Bachelor of Arts (BA) in Economics

Bishop Jesudasan CSI Arts & Science College, Mulayara, University of Kerala

2018-2021

Percentage: 67%

Skills

Languages: Python, SQL

Frameworks: TensorFlow, Keras, Scikit-learn, Flask, Streamlit

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Plotly, yfinance

Tools: Power BI, Tableau, Looker Studio, GitHub, JIRA

Platforms: Jupyter Notebook, Google Colab, VS Code
